

RAJITHLINGAM A

FRONT END DEVELOPER

ABOUT ME

I am a recent college graduate who is interested in developing the skills needed to become a professional in the field of computer-assisted design. I bring a wide range of relevant skills to the table as well as all required certifications. My hope is to contribute coachability and work ethic as I grow with a dynamic company that prioritizes green design and functionality. Skills

SKILLS

Communication Skills:

Effective verbal and written communication is crucial in any job. Being able to convey your ideas clearly and listen actively to others is essential.

Problem-Solving:

The ability to analyze problems, identify solutions, and make decisions is valuable in virtually every field.

Adaptability:

The capacity to learn quickly and adapt to new situations, technologies, and environments is highly desirable in a rapidly changing job market.

Critical Thinking:

The skill to evaluate information, make reasoned judgments, and approach challenges with a logical and analytical mindset

Time Management:

Efficiently managing your time, setting priorities, and meeting deadlines is essential for productivity in any role.

Teamwork: The ability to collaborate

Research Skills:

The capability to gather information, conduct research, and synthesize data from various sources.

Attention to Detail:

Being meticulous and thorough in your work to avoid errors and ensure quality.
